SUMMARY

Full-stack software engineer experienced in architecting and delivering high-performance web applications with React, Spring Boot, and AWS. Skilled in scalable system design, cloud-native solutions, and leading cross-functional teams to drive measurable business outcomes. Recently completed an M.S. in Computer Science at Northeastern (GPA: 3.92). Passionate about building clean architectures and iterating rapidly in both startup and enterprise environments.

EDUCATION

Northeastern University, Khoury College of Computer Sciences – Boston, MA May 2026
Candidate for M.S. in Computer Science

- GPA: 3.92/4.00

Middlebury College – Middlebury, VT 2023
B.A. in Computer Science, Mathematics Minor

- Honors: *magna cum laude* (GPA: 3.79/4.00), Computer Science departmental honors

TECHNOLOGIES

- **Languages:** Java, Python, JavaScript, C, C++
- **Databases:** SQL, MongoDB, PostgreSQL
- **Tools:** Spring, React, Next.js, GraphQL, AWS, Docker, Heroku, Git, Jira, Agile, CI/CD

EXPERIENCE

TOAST – Remote Jul 2025 - Present
Software Engineer

- Partnered with PMs and UX designers to launch **React**-based features that streamlined restaurant support workflows.
- Led the design and implementation of scalable APIs and real-time data pipelines using **Java** and **AWS**, improving customer issue resolution time by **30%**.
- Enhanced customer support tools used by **10k+ restaurants**, optimizing front-end performance and ensuring a smooth user experience.

EARTH BRANDS – Remote Feb 2024 – Jul 2025
Full-Stack Software Developer

- Architected and launched a custom **B2B e-commerce web portal** using **React, Next.js, GraphQL, and AWS**, driving a **250% increase in online revenue**.
- Designed and implemented a scalable internal **order management system (OMS)** leveraging **AWS** and modern frameworks, improving operational efficiency by **40%**.
- Led Agile ceremonies, performed code reviews, and integrated automated testing and **CI/CD pipelines** to ensure high-quality, reliable software delivery.

PUBLICIS SAPIENT – Chicago, IL Jun 2023 – Aug 2023
Software Engineering Intern

- Developed and deployed a real-time **stock trading platform** using **React, Spring Boot, and GraphQL**, achieving **99.99% uptime** and seamless transaction processing.
- Completed 10-week full-stack engineering training program, building full-stack applications in collaborative agile teams of 5–6 members, gaining hands-on experience with **8+ technologies** including **React, Spring Boot, and MongoDB**.
