EXPERIENCE

EARTH BRANDS – Remote   2024 - Present
Senior Software Developer (Jan 2025 – Present)
- Directed the development and maintenance of the company's e-commerce platform and ERP system, ensuring seamless functionality and scalability.
- Spearheaded the creation of multiple internal tools, driving a ~60% increase in company-wide revenue year-over-year.
- Ensured website stability by promptly diagnosing and resolving bugs and optimizing functionality without disrupting development timelines.

Software Developer (Apr 2024 – Jan 2025)
- Designed and implemented a custom B2B e-commerce portal, driving a 250% increase in online revenue by facilitating seamless client transactions for Earth Brands' products.
- Developed an internal order management tool that streamlined employee workflows, contributing to a 40% increase in company revenue.
- Leveraged React Native, GraphQL, JavaScript, AWS, and Next.js to deliver robust full-stack development solutions.

Software Development Intern (Feb 2024 – Apr 2024)
- Created an automated email alert system, enhancing company outreach and improving customer follow-up rates.
- Integrated subscription and invoice payment options, boosting customer satisfaction and streamlining the payment process.
- Customized a prime membership program to enhance customer benefits, directly contributing to increased user engagement and company growth.

PUBLICIS SAPIENT – Chicago, IL   2022
Software Engineering Intern (Jun 2022 – Aug 2022)
- Deployed a trading platform with real-time stock data and low-latency trade executions using React Native, Figma, Java Spring Boot, GraphQL, and PostgreSQL.
- Completed an intensive full stack development course, gaining expertise in React, Angular, MongoDB, NoSQL, MySQL, REST APIs, and Spring Boot.
